### DETAILED ACTION

- 1) Acknowledgement is made of Amendment received 7/1/2005. Claims 25, 33, are amended.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 2) Claims 25-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over NAJI (6,030,447) in view of the ADMITTED PRIOR ART (Specification paragraph [0031] and Table 1) with or without WINGERSON (6,419,788).

NAJI teaches a composite building material comprising cellulose fibers which reinforce the product (col. 2, lines 7-19, and an aggregate (siliceous material, see Abstract), a density modifier (col. 2, line 21) and one or more additives (col. 2, lines 20-31).

The ADMITTED PRIOR ART teaches that conventional pulping and washing at conventional temperatures (55-60 °C) results in cellulose fibers, e.g. the cellulose fibers of NAJI, having a COD content of 5 k#/ton. The claimed "less than about 5 kg/ton" (emphasis added) would read on 5 kg/ton +/- 10%, e.g. "less than 4.5 to 5.5 kg/ton".

The "5.5 kg/ton", which reads on the claimed "less than 4.5 to 5.5 kg/ton" does not define over the washing of the ADMITTED PRIOR ART or the product of NAJI. If

Art Unit: 1731

necessary, WINGERSON teaches producing substantially pure cellulose (col. 3, line 56) by first treating cellulosic material with steam and then washing with alkaline hot wash water containing dissolved oxygen at elevated temperatures, e.g. 180 to 240 °C to remove decompose, mobilize and remove lignin, extractives and residual hemicellulose, e.g. the COD's. It would have been obvious to the artisan to further remove the COD's of NAJI and/or the ADMITTED PRIOR ART using the elevated washing temperatures of WINGERSON. Such a washing would lower the COD's of NAJI to less than 5 kg/ton. It is noted that the instant process can also use oxidized wash liquor, e.g. the same wash water used by WINGERSON, see instant specification page 3, [0009].

### ***Response to Amendment***

3) Amended Specification by adding serial numbers and status of applications is accepted.

4) Applicants' arguments filed 7/1/2005, have been fully considered but they are not persuasive.

Applicants allege that the submitted Declaration Under 37 C.F.R. 1.131 is showing reduction to practice and/or conception prior to February 29, 2000, the publication and issue date of the cited prior art reference, NAJI.

The Declaration Under 37 C.F.R. 1.131 is not showing reduction to practice and/or conception prior to February 29, 2000, the publication and issue date of the cited

prior art reference, NAJI. Exhibits A and B do not show reduction to practice and/or conception prior to February 29, 2000. Also, the exhibits A and B are not dated.

### ***Conclusion***

5) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.
